this book presents the latest research on ambient intelligence including software and applications ambient intelligence ami is a paradigm emerging from artificial intelligence where computers are used as proactive tools assisting people with their day to day activities making everyone s life more comfortable the inclusion of computational power and communication technologies in everyday objects is growing and their embedding into our environments should be as invisible as possible in order for ami to be successful human interaction with computing power and embedded systems in the surroundings should be smooth and happen without people actually noticing it the only awareness people should have arises from ami more safety comfort and wellbeing emerging in a natural and inherent way isami is the international symposium on ambient intelligence aiming to bring together researchers from various disciplines that constitute the scientific field of ami to present and discuss the latest results new ideas projects and lessons learned

the fourth edition of introduction to educational research by craig a mertler guides readers through the steps of the research process to help them plan and execute research projects in educational settings with balanced coverage of qualitative and quantitative methods an emphasis on ethics and concrete applications of methods this text offers a practical presentation of the research process new to the fourth edition are more information on interviews throughout the book expanded coverage of qualitative research and a thoroughly updated chapter on action research three current research articles are included as appendices to demonstrate qualitative quantitative and mixed methods comprehensive and student friendly introduction to educational research uses conversational and nontechnical language to help students clearly understand and apply research concepts principles procedures and terminology

existing narratives about how we should organize are built upon and reinforce a concept of good management derived from what is assumed to be a fundamental need to increase efficiency but this assumption is based on a presentist monocultural and generally limited view of management s past a new history of management disputes these foundations by reassessing conventional perspectives on past management theories and providing a new critical outline of present day management it highlights

alternative conceptions of good management focused on ethical aims sustainability and alternative views of good practice from this new historical perspective existing assumptions can be countered and simplistic views disputed offering a platform from which graduate students researchers and reflective practitioners can develop alternative approaches for managing and organizing in the twenty first century
